•		SIKYIN IP PRIMARY EXAMINER				

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 5. does NOT place the application in condition for allowance because: The Exhibit fails to substantiate applicants' argument because the hard solders in said exhibit are not Sn base. Applicants' argument as set forth in page 6 of instant remarks is noted. But, the instant claims require Cr which has melting point about 900 C higher than Cu. Therefore, applicants' argument with factual data has no patentable weight. The same response is also applicable to the argument with respect to Ni in Tanaka '242.
